

FILLING INSTRUCTIONS

## How Much Fill?

### Marine Bean® Collection - the original outdoor beanbag

|                   | Litres | Cubic Feet | Kilos |
|-------------------|--------|------------|-------|
| Ottoman           | 180    | 6.50       | 0.90  |
| Marine Bean Large | 220    | 8.00       | 1.10  |
| Marine Bean XL    | 380    | 13.50      | 1.90  |
| Marine Bean XXL   | 750    | 26.50      | 3.75  |

### The Isla™ Collection

|              | Litres | Cubic Feet | Kilos |
|--------------|--------|------------|-------|
| Isla Ottoman | 360    | 12.75      | 1.80  |
| Isla Chair   | 550    | 19.50      | 2.75  |
| Isla Lounger | 800    | 28.25      | 4.00  |

## Bean Suppliers

Polystyrene beans are available from many retail outlets – such as department stores, furniture and craft shops – and may also be obtainable from manufacturers of expanded polystyrene.

For a full list of suppliers please see our website [www.coastnewzealand.com/beans](http://www.coastnewzealand.com/beans)

## Safety Zip

For your safety, the liner of your beanbag is fitted with a locking zip. To open and close the liner, slide an unbent paperclip through the top of the zip slider and use it to pull the slider up or down the zip. When you have filled the liner, close the zip securely and remove the paperclip.

Please contact us if you have any questions relating to the safe use of your beanbag.

*Filling your beanbag is definitely a two-person job. Please see the next page for our recommended techniques.*

## Filling the Classic Marine Bean

- Unzip the liner and the Sunbrella shell;
- While one person holds open the liner, the other should slowly pour in the beans;
- Shake the liner into the Sunbrella shell;
- Be sure to line up the top of the liner (mesh) with the top of the shell (handle);
- Be sure to line up the liner zip with the shell zip.

We recommend that you do not over-fill your beanbag – when you sit, you should be able to sink well into the beanbag without touching the floor.

## Filling the Isla

- Unzip the liner and the Sunbrella shell;
- While one person holds open the opening of the liner, the other should slowly pour in the beans;
- Shake the liner to distribute the beans evenly through the liner;
- Fill to about 90% capacity.

Please note that most polystyrene beans will compress over time and that you may need to top-up your beanbag from time to time.

If for any reason you need to replace your beans, please dispose of the old beans responsibly - see recycling information on the next page.

## Sitting in your Beanbag

Coast beanbags are primarily designed for lounging, not for perching.

Achieve the perfect lounging position by lying your beanbag on its back (i.e. with the zip against the ground), then sink into the middle. And relax.

## Sunbrella Care Instructions

The Marine Bean range features marine-grade Sunbrella brand fabric, the leader in performance fabrics for over 45 years.

Sunbrella fabrics will retain their colour and strength, resist mildew and rot and withstand years of exposure to sun and rain.

Maintain your Marine Bean with regular cleaning using a brush, damp cloth or hose. For further care and cleaning instructions, refer to our website: [www.costnewzealand.com/technical-info](http://www.costnewzealand.com/technical-info)

## Recycling

Polystyrene beans will last for a long time and should not need to be replaced. Polystyrene biodegrades very slowly, but can be recycled and/or re-used.

There are now a number of government-sponsored and private enterprises that will collect or receive polystyrene for recycling.

We encourage you to dispose of polystyrene beans responsibly. Avoid emptying your liner into the rubbish or into a recycling bin as most of the beans will blow away.

If for any reason you need to replace your beans, please contact us and we can send you a replacement liner for a nominal charge (to cover shipping). You can then take your existing filled liner to be recycled.

### ***Warning!***

*Small, lightweight beads present a severe danger to children if swallowed or inhaled.*
